

“Private, Reliable, FREE Voicemail System!”

This private, easy-to-use and FREE voice mailbox system allows you to record detailed greetings for your listeners as well as receive messages, like a traditional answering system. Once your SimpleVoiceBox is set up, simply instruct your prospective clients, customers, friends or family to dial into the voice mailbox, enter the extension number and listen to your message. It's simple and direct. There are no contracts, commitments or hidden fees. Plus, our state-of-the-art, digital equipment delivers crystal clear voice quality and provides enhanced features for a turn-key, hassle-free voice mailbox system.

SimpleVoiceBox offers a rich feature set comparable to today's most advanced messaging centers and it's all FREE! Multiple Configurations - decide if you want your listeners to be able to leave response messages or not. It can operate as a traditional voicemail or as an information broadcaster. Online Account Management - every account comes with an online administration tool for controlling and organizing your messages. RSS Feed Capability - allows subscribers to automatically receive your updated messages through podcasting and RSS feeds. Email Message Notification - the system will send you an email notification whenever you receive new messages. Extended Message Time - incoming and outgoing message length up to 1 hour with a maximum of 30 incoming messages at any given time.
